ARTICLE 1

Name

The official name of the Institute is Panorama Research Institute, abbreviated as PRI and referred to in this Charter as the Institute.

The Institute may be referred to as "Panorama Research Institute", "PRI", or "the Institute" in official documents, publications, and communications. No other abbreviated form is authorized for use in formal contexts.

Institutional Status

The Institute is a research institute established by Panorama Scholarly Group (PSG, also referred to in this Charter as the Group). The Group is the Institute's parent organization and the legal and administrative entity through which the Institute operates. The Institute is not a separate legal entity.

The Institute shall maintain its own academic governance, research programmes, research centres, scholarly appointments, publications, and institutional identity in accordance with this Charter. It shall exercise independent academic judgment in research activities, publication decisions, editorial judgments, and other scholarly functions within the Group's overall governance, legal, and administrative framework. Academic independence shall not confer separate legal personality or independent financial authority on the Institute.

Contracts, legally binding agreements, and other formal legal instruments relating to Institute activities shall identify the Group as the legal party and shall be executed by its authorized representatives. Such instruments may identify the Institute as the organization carrying out the research or scholarly activities. The Institute shall not be registered as a separate legal entity or maintain financial accounts separate from the Group.

Institutional Affiliation

The Group is the Institute's establishing and parent organization and its legal and administrative entity. Official descriptions of the Institute's status, governance relationship, or legal capacity shall state that the Institute was established by the Group, maintains its own academic governance and institutional identity, operates within the Group's legal and administrative framework, and is not a separate legal entity.

Scholars holding an authorized academic affiliation with the Institute may use "Panorama Research Institute" as their institutional affiliation in scholarly outputs and profiles. Such affiliation shall not, of itself, establish an employment relationship, authorize the scholar to bind the Group, or confer separate legal personality on the Institute. Where legal or contractual capacity is relevant, the Group shall be identified as the legal party and the Institute's lack of separate legal personality shall be expressly stated.

The Institute may propose, negotiate, and coordinate academic cooperation arrangements, memoranda of understanding, and collaboration proposals under its institutional name. Any instrument requiring formal execution or creating legal or financial obligations shall identify the Group as the legal party and shall be signed by a representative authorized by the Group. Use of the Institute's name shall not, of itself, confer authority to execute such instruments.

Mission

The mission of Panorama Research Institute is to advance scholarly knowledge through rigorous, independent, and interdisciplinary research; to support the development of global scholarly communication infrastructure; and to promote openness, transparency, and integrity in academic publishing and research practice.

In pursuing this mission, the Institute commits to the highest standards of academic quality, research ethics, and institutional governance. It supports scholars at all career stages, fosters collaboration across disciplines and institutions, and ensures that its outputs are publicly accessible and grounded in sound scholarly practice.

Scope of Activities

The Institute conducts and supports the following categories of activity:

- Interdisciplinary research across its designated research areas, conducted through research centers and projects
- Establishment, development, and management of research centers within the Institute's research areas
- Initiation, management, and support of research projects affiliated with the Institute's research centers
- Publication of research reports, working papers, policy briefs, edited volumes, guidelines, and annual reports
- Organization and co-organization of academic conferences, seminars, workshops, and training programs
- Management of scholar and fellowship programs, including Research Fellows, Associate Research Fellows, Visiting Scholars, and Research Assistants
- Institutional collaboration and research partnership activities with universities, research institutions, publishers, and scholarly organizations
- Development of open scholarly infrastructure, including databases, evaluation frameworks, and metadata systems
- Policy analysis and advisory activities relevant to the Institute's research areas
- Capacity-building activities for researchers, journal editors, and scholarly practitioners

Research Areas

The Institute designates the following research areas within which its research centers, projects, publications, and events are organized. Research areas may be expanded or revised through a formal amendment to this Charter in accordance with Article 20.

I **Scholarly Publishing Studies**

Research on open access models, peer review systems, publication ethics, editorial standards, research integrity, and the structures and practices of academic publishing.

II **Scholarly Indexing and Evaluation**

Research on journal indexing systems, citation metrics, journal quality frameworks, database governance and transparency, and open scholarly infrastructure for evaluation.

III **Policy and Social Research**

Research on higher education policy, science and innovation governance, social governance, digital governance, and the policy dimensions of scholarly communication.

IV **AI and Future Society**

Research on artificial intelligence governance, AI ethics, human-AI interaction, the implications of AI for scholarly communication and knowledge production, and digital futures.

V **Education and Learning Research**

Research on education systems, pedagogical practice, learning science, educational policy, and the role of technology in learning environments.

VI **Arts, Culture and Embodiment**

Research on artistic practice, cultural studies, embodied cognition, creative inquiry, and the intersections of arts and humanities with academic and social inquiry.

VII **Health and Medical Research**

Research on mental health, psychiatry, public health, and clinical research, examining medicine and well-being as fields of scholarly inquiry and public relevance.

Organizational Structure

The Institute comprises the following organizational units. Each unit is responsible for a defined domain of institutional activity and reports to the Institute Director.

Institute Office

Responsible for overall administration, governance compliance, internal coordination, external communications, and the maintenance of official records. Headed by the Institute Director.

Research Centers

The primary academic units of the Institute. Each center has a defined thematic mandate, a Director, and a program of research projects, publications, and events. Currently active centers are listed in Article 9.

Project Teams

Responsible for carrying out approved research projects, coordinating project contributors, maintaining project documentation, and reporting project progress to the relevant Research Center Director.

Publications Unit

Responsible for the editorial management, production, and open access dissemination of all Institute publications, including research reports, working papers, policy briefs, edited volumes, and the annual report.

Academic Events Unit

Responsible for planning, coordinating, and delivering the Institute's program of conferences, seminars, workshops, training programs, and calls for papers and chapters.

Scholar and Fellowship Program

Responsible for recruiting, onboarding, and supporting Research Fellows, Associate Research Fellows, Visiting Scholars, and Research Assistants, and for maintaining the Institute's scholar community.

Collaboration Office

Responsible for managing the Institute's external partnerships, institutional cooperation agreements, research project proposals, edited volume proposals, and event co-organization inquiries.

Research Ethics and Standards Office

Responsible for research ethics review coordination, integrity guidance, conflict-of-interest disclosure management, and the maintenance of research standards across Institute activities.

Governance

The Institute shall be governed through the structure set out in this Article. Its governance bodies shall exercise their respective functions in accordance with this Charter and the Group's overall governance framework.

Institute Director

The Director is the head of the Institute and is responsible for its overall academic direction, governance compliance, external representation, and institutional development. The Director is appointed by Panorama Scholarly Group.

Research Center Directors

Each Research Center is directed by a Research Center Director responsible for the Center's research program, fellow management, and scholarly activities. Center Directors are appointed by the Institute Director.

Advisory Board

The Advisory Board is an independent consultative body comprising distinguished scholars and practitioners. It advises on research priorities, academic standards, and institutional development. It has no executive authority.

Panorama Scholarly Group

As the parent organization and legal and administrative entity, PSG holds ultimate institutional governance authority, approves the Charter and material amendments, administers Institute finances, and executes formal legal instruments through authorized representatives. PRI's academic bodies retain independent academic judgment in accordance with this Charter.

Research Centers

Research Centers are the primary academic units within the Institute. Each Center is established within one or more of the Institute's designated research areas and is responsible for developing and managing research projects, producing publications, organizing events, and building scholarly networks within its domain. Each Center is headed by a Director and staffed by affiliated Research Fellows and other scholars.

New Research Centers may be established by the Institute Director with the approval of Panorama Scholarly Group, provided the proposed Center falls within a designated research area. The establishment, modification, or closure of a Research Center does not require an amendment to this Charter unless the change involves a modification to Article 6.

Currently Established Research Centers

- 01 Center for Scholarly Publishing Studies Active
- 02 Center for Scholarly Indexing and Evaluation Active
- 03 Center for Policy and Social Research Active
- 04 Center for AI and Future Society Upcoming

Research Projects

Research Projects are formal, Institute-sanctioned research initiatives affiliated with one or more Research Centers. Each project has a defined scope, research questions, methodology, timeline, and expected outputs. Projects are initiated through a formal proposal process reviewed by the relevant Research Center Director and approved by the Institute Director.

Projects may be led by affiliated Research Fellows, visiting scholars, or external researchers, provided their work meets the Institute's standards for research quality and ethics. All research conducted under the Institute's name must be consistent with the values, policies, and ethical standards established by this Charter.

The Institute maintains a public record of all active and completed research projects on its website. Project status changes — including initiation, suspension, and completion — are managed by the relevant Research Center Director with notification to the Institute Office.

Publications

The Institute publishes the following categories of publication. All publications are subject to editorial review, quality control, and compliance with the Institute's publication ethics policy before release.

Research Reports

Full-length reports presenting substantial original findings from Institute research projects. Subject to internal review and external peer review.

Working Papers

Shorter documents presenting preliminary findings, theoretical frameworks, or scholarly arguments. Subject to internal editorial review.

Policy Briefs

Concise, evidence-based documents presenting policy-relevant findings and recommendations. Subject to internal editorial review.

Edited Volumes

Collaborative academic volumes bringing together original contributions from multiple scholars on a defined research theme. Published in association with partner academic publishers.

Annual Reports

Yearly institutional reports covering the Institute's research activity, publications, events, scholar program, and governance disclosures.

Guidelines and Standards

Practical standards and guidance documents developed from Institute research for use by journals, publishers, and academic institutions.

All Institute publications are published under open access terms and are freely available on the Institute's website. Each publication receives a Digital Object Identifier (DOI) registered with Crossref. Authors retain copyright in their work but grant the Institute a non-exclusive, perpetual licence to publish, distribute, and archive the work.

Academic Events

The Institute organizes and co-organizes academic events to advance scholarly exchange in its research areas and to support its research community. Events include international conferences, academic seminars, research workshops, training programs, and related academic gatherings.

Events may be organized independently by the Institute or co-organized with partner institutions. Co-organized events must be approved by the Institute Director and must comply with the Institute's academic standards, ethical requirements, and branding guidelines. All co-organized events must not compromise the academic independence of the Institute's research or the integrity of its scholarly community.

The Academic Events Unit is responsible for administering calls for papers, managing event logistics, coordinating speakers and participants, and producing event records and proceedings where applicable.

Scholars and Fellows

The Institute maintains a community of affiliated scholars through the following formal categories of affiliation. Each category carries defined responsibilities and entitlements. Affiliation does not constitute employment by Panorama Research Institute or Panorama Scholarly Group unless separately specified.

Research Fellow

An established researcher (typically holding a doctoral degree or equivalent) who makes a formal commitment to contribute to the Institute's research program through original publications, participation in events, and engagement with the Institute's scholarly community. Appointment is for one to three years, renewable.

Associate Research Fellow

An early-career researcher or doctoral student who contributes to Institute research projects and activities. Typically appointed for one year, renewable upon satisfactory contribution. Associate Fellows may be considered for promotion to Research Fellow.

Visiting Scholar

An established researcher who affiliates with the Institute for a defined period (typically three to twelve months) to pursue research in collaboration with the Institute's scholars. Visiting scholars may be resident or remote.

Research Assistant

A postgraduate student or early-career researcher engaged on a project-specific basis to support research tasks under the supervision of a Research Fellow or Research Center Director.

All affiliated scholars are required to adhere to the Institute's research ethics policy, conflict of interest policy, and other governance documents. The Scholar and Fellowship Program is administered by the Scholar Program Coordinator under the oversight of the Institute Director.

Collaboration

The Institute engages in academic collaboration with universities, research institutes, publishers, scholarly associations, and other organizations. Collaboration activities must be consistent with the Institute's mission, research areas, and values, and must not compromise the academic independence of the Institute's research or the integrity of its scholars.

Formal cooperation agreements relating to Institute activities shall identify the Group as the legal party and shall be executed by its authorized representatives. The Institute shall coordinate the relevant scholarly activities without acquiring separate legal personality. The Collaboration Office shall manage cooperation inquiries, proposals, and continuing partnership arrangements.

- Institutional cooperation agreements and memoranda of understanding
- Joint research projects and collaborative publications
- Co-edited academic volumes and co-organized special journal issues
- Co-organized academic conferences, seminars, workshops, and training programs
- Scholar and visiting researcher exchange programs
- Joint capacity-building and training initiatives

Formal cooperation agreements relating to PRI activities must identify PSG as the legal party and be executed by its authorized representatives. PRI is the research institute coordinating the academic activities and is not a separate legal entity. The Collaboration Office manages collaboration inquiries, proposals, and ongoing partnership arrangements.

Research Ethics

The Institute is committed to the highest standards of research ethics. All research conducted under the Institute's auspices must comply with applicable ethical principles, including respect for persons, beneficence, non-maleficence, justice, and transparency.

The following principles constitute the Institute's minimum ethical standards. They are elaborated in the Institute's Research Ethics Policy, which is adopted as a subsidiary governance document to this Charter.

- Research involving human participants must comply with applicable ethical review requirements and must obtain informed consent where required.
- Research data must be collected, managed, retained, and shared in accordance with the Institute's Data and Documentation Policy.
- Research findings must be reported honestly, accurately, and without selective omission of material evidence.
- Research methods and limitations must be disclosed transparently in all publications.
- Fabrication, falsification, and plagiarism are prohibited and constitute grounds for immediate withdrawal of affiliation and retraction of affected publications.
- Authors must accurately represent their contributions to any published work and must not include persons as authors who have not contributed substantively.

Alleged violations of research ethics standards should be reported to the Institute Director. The Institute Director will investigate reported violations and may take remedial action including retraction of publications, withdrawal of affiliation, or referral to the researcher's home institution.

Conflict of Interest

All persons affiliated with the Institute — including Research Fellows, Associate Research Fellows, Visiting Scholars, Research Assistants, Research Center Directors, and the Institute Director — must disclose any actual, potential, or perceived conflict of interest that may affect, or be seen to affect, the integrity of their research, publications, editorial judgments, or other professional activities conducted under the Institute's name.

A conflict of interest exists where a person's financial interests, institutional relationships, personal relationships, or other interests could influence or be perceived to influence their professional judgment. The threshold for disclosure is low: where in doubt, disclosure is required.

Conflict of interest disclosures must be made in all Institute publications where relevant, and must be made to the Institute Director upon commencement of affiliation and whenever a new conflict arises. Failure to disclose a material conflict of interest may constitute a research ethics violation under Article 15.

Full provisions governing conflict of interest identification, disclosure, and management are set out in the Institute's Conflict of Interest Policy, which is adopted as a subsidiary governance document to this Charter.

Intellectual Property

Copyright in research publications produced under the Institute's auspices is retained by the named authors. Authors grant Panorama Research Institute a non-exclusive, perpetual, irrevocable, worldwide, royalty-free licence to publish, reproduce, distribute, archive, and make available the work in any format, including digitally.

All Institute publications are released under a Creative Commons Attribution 4.0 International licence (CC BY 4.0) unless an alternative open licence is agreed upon in writing with the author(s) prior to publication. The CC BY 4.0 licence permits any person to share, adapt, and use the work for any purpose, provided that appropriate credit is given to the author(s) and the Institute.

Research data produced in the course of Institute-affiliated research should be made publicly available to the fullest extent consistent with applicable privacy, confidentiality, and legal requirements. Data availability statements must be included in all research publications.

The Institute's name, logo, and visual identity are the property of Panorama Scholarly Group. Their use is governed by the Name and Logo Usage Policy set out in Article 18 and the subsidiary governance document adopted pursuant to it.

Use of Name and Logo

The name "Panorama Research Institute" and the Institute's logo may only be used by persons and organizations authorized to do so. Authorization is conferred by the Institute Director or, in the case of formal institutional uses, by Panorama Scholarly Group.

Authorized uses include: use by affiliated scholars in connection with Institute-sanctioned research and publications; use by partner institutions in documents that have been formally approved by the Institute; use by media in accurate reporting about the Institute; and use in events that have been formally co-organized with the Institute.

Prohibited uses include: implying Institute endorsement of any position, product, or organization that has not been authorized; using the Institute's name in the title or cover of a publication that the Institute has not approved; altering or distorting the Institute's logo; and using the Institute's name or logo after an affiliation has ended.

Detailed usage requirements, including logo specifications, are set out in the Institute's Name and Logo Usage Policy, which is adopted as a subsidiary governance document to this Charter.

Finance and Administration

The Group shall be responsible for the legal, financial, and administrative arrangements supporting the Institute. Institute funds, receipts, payments, financial records, and liabilities shall be administered within the Group's financial framework. The Institute shall not maintain separate financial accounts, hold funds as a separate legal person, enter into financial contracts independently, or incur liabilities in its own name.

Operational budgets for the Institute's research, publication, event, and scholar programmes shall be allocated by the Group in consultation with the Institute Director. The Director shall administer expenditures within the allocated budgets and the authority granted by the Group, and shall submit financial reports to the Group as required.

Fellowship stipends, honoraria, or other compensation paid to affiliated scholars shall be administered by the Group. Eligibility, availability, and amounts shall be determined individually under the applicable arrangements. Academic affiliation alone shall not create an entitlement to such payments.

Institute publications, the website, and formal institutional communications shall disclose the relationship between the Institute and the Group in accordance with Article 3. External research grants or contributions supporting Institute activities shall be received and administered by the Group, which shall be identified as the legal recipient or contracting party where applicable. Relevant publications shall disclose funding sources and conflicts of interest. Financial administration, funding arrangements, and budget approval shall not confer authority to determine research findings, editorial judgments, or publication decisions. Those matters shall remain subject to the Institute's academic governance, ethics, and quality standards.

Amendment and Interpretation

This Charter may be amended by the Institute Director with the approval of the Group. Proposed amendments shall be circulated to all Research Center Directors and the Advisory Board at least thirty days before adoption for comment. Comments received shall be considered before the decision on adoption, but shall not be binding.

Amendments shall take effect on the date of adoption unless a later effective date is specified. The Charter's version number and effective date shall be stated on the cover. The Institute Office shall maintain the complete version history and make it available upon request.

Subsidiary governance documents — including the Research Ethics Policy, Conflict of Interest Policy, Publication and Reporting Policy, Data and Documentation Policy, Academic Independence Policy, and Name and Logo Usage Policy — may be adopted, amended, or replaced by the Institute Director without a formal Charter amendment, provided they do not conflict with the provisions of this Charter.

The Institute Director has final interpretive authority over the provisions of this Charter. Where ambiguity arises in the interpretation of any provision, the interpretation that is most consistent with the Institute's mission as set out in Article 4 shall be preferred. In the event of a conflict between this Charter and any subsidiary governance document, this Charter prevails.
